

# LEAD FREE TILE SKYLIGHT

A press formed metal base follows the tile line allowing tiles to sit neatly around the base for that perfect appearance. Lead free construction eliminates corrosive run-off to Zinalume® and Colorbond® flashings and gutters. Adapters are available for Wunderlich Swiss and similar high profile tiles. P.O.A

## MATERIALS

Standard skylights are constructed with a press formed Zinalume® base and an acrylic dome. Fabricated bases are available (in stainless steel, aluminum, copper and galvanised) to meet individual customer requirements. Domes can also be manufactured from high impact acrylic, in clear, opal or tint finishes.
