LEAD-FREE TILE SKYLIGHT

INSTALLATION INSTRUCTION SHEET

FITS MOST TILE ROOF PROFILES

*Adapters can be supplied on request for Wunderlich & similar high profile tiles. P.O.A

1

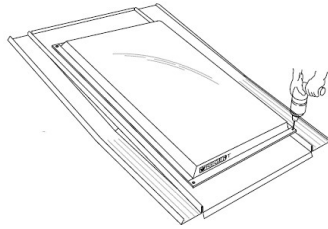

Raw edges of components of Regent Skylights & cut edges of roofing iron are sharp. Care must be taken to avoid injury during installation.

REVERSE SIDE FLASHING BEFORE INSTALLATION

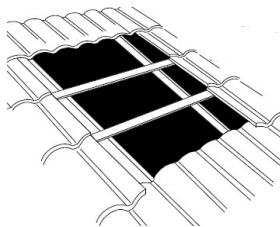

2

Remove dome glazing from Skylight base (if supplied assembled), by drilling out pop rivets from trim glazing section

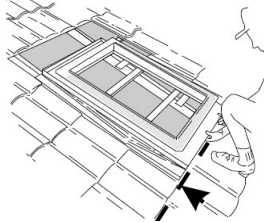

3

Remove required amount of tiles to allow base to be positioned correctly.

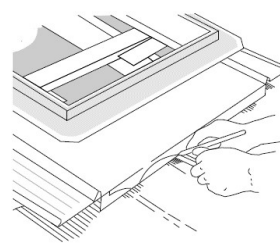

4

Place base in position, making sure the front apron is in line with the tile row.

NOTE: Alignment of front of Skylight is important for correct appearance.

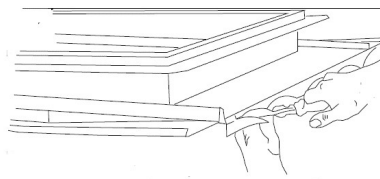

5

Mark front apron to tile profile using a small piece of timber to follow the profile shape

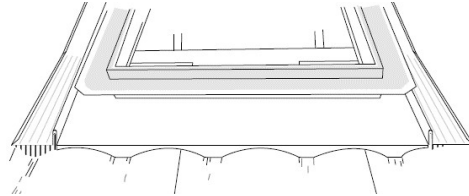

6

WARNING: Before notching out profile, check Skylight is in the desired position, as once notching is completed, the unit cannot be moved sideways.

Now notch to profile

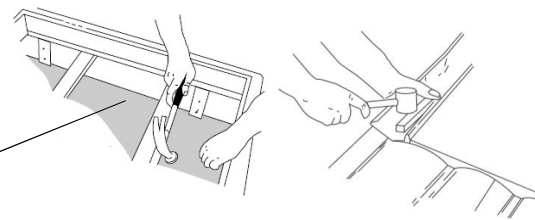

7

Make sure front apron is in line with the tile fronts before proceeding to step 8. Base should now be in position, with profile correct.

8

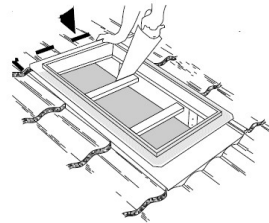

Nail fixing tabs to rafter or truss

Gently tap malleable flashing to tile profile using a small piece of timber & mallet

9

Proceed to lay tiles over side flashing only, ensuring tiles are neatly seated against tray.

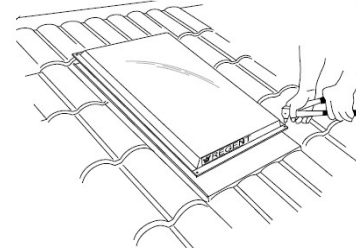

NOTE: Do NOT lay tiles over top of Zinalume steel flashing tray, except at rear of Skylight.

Cut out battens to leave clear opening.

10

Replace dome glazing & trim section to unit. Rivet ONLY at corners, DO NOT rivet through glazing.

Your Regent Lead-free TILE Skylight is complete
