

SOLID POLISHED ALUMINIUM SHAFT TUBELIGHTS

RECOMMENDED FOR SHAFT LENGTHS OVER 3 METRES

Regent's unique patented pressed formed metal base models suit most forms of roofing. These bases are designed to reduce problems associated with traditional skylight flashings. These fully flashed tubelight kits provide everything you need to bring natural light into your living environment and are ideal for the handyman and tradesman alike. Kits are complete with:

- > Hi-impact opal acrylic dome fixed to a fully flashed metal base
- > 1.2m highly polished shaft with specular reflectance to conform with AS4285.
- > Pitch adapter for ease of installation
- > Circular ceiling trim and diffuser

Regent Non-Vented BFA Tubelights comply to AS3959 requirements for Bushfire areas up to and including BAL 19. They will also comply with BAL 29 requirements if roof pitch is 18° or greater.

Fire Dampers for 400mm Tubelights are available as an accessory for fire rated ceiling installations.

MATERIALS

Standard tubelights are constructed with a press formed Zinalume® base and a high impact acrylic (prismatic) dome. Fabricated bases are available (in stainless steel, aluminum, copper and galvanised) to meet individual customer requirements. Domes can also be manufactured from polycarbonate and in clear, opal or tint finishes.
