

EXTRACTAVENT - REV 100

AVAILABLE FOR ALL ROOF TYPES

The Rev 100 is an innovative natural lighting and ventilation system. A press-formed one piece base allows the product to mate perfectly with the roof type / profile. This, combined with a SINGLE PENETRATION TO THE ROOF, incorporating both the skylight dome and an all weather exhaust fan, eliminates leaking problems, and increases the service life of the product and the roof. A combined 400mm dia. light and air shaft requires only a single penetration to the ceiling, providing an unobtrusive and aesthetic finish.

The product is ideal for bathrooms, toilets, ensuites and any other room requiring light and ventilation. It is the perfect solution for meeting building code and local authority requirements.

FAN CAPACITY

AIR MOVEMENT	FAN THROAT	POWER	HERTZ
328m ³ /hr	∅ 213mm	35 W	50Hz

The skylight system illustrations contained in this brochure are the sole property of Regent Skylights and are reserved under copyright law. It is the responsibility of the user to ensure that the selected skylight system complies with the relevant building codes and authorities requirements. Regent Skylights reserves the right to improve or modify the skylight systems at any time. Zinalume® and Colorbond® are registered trademarks of BlueScope Steel Limited. All Wiring and connections to power must be carried out by a licensed electrical contractor to SAA wiring rules.
