

## EXTRACTAVENT - REV 400

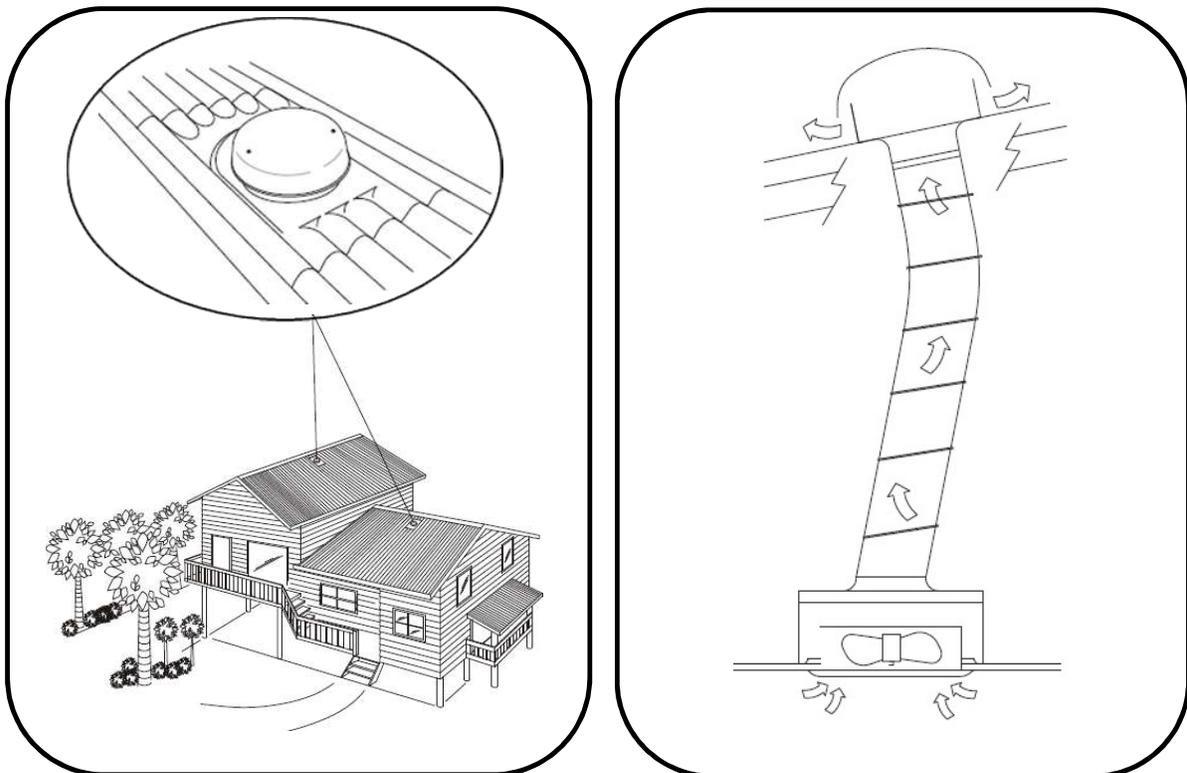

### AVAILABLE FOR ALL ROOF TYPES

The Rev 400 is an innovative ventilation system designed to exhaust unwanted air through the roof.

A press-formed one piece base allows the product to mate perfectly with the roof type / profile, reducing reliance on sealants for waterproofing and allowing for efficient and effective installation.

A single 150mm diameter air shaft is used to fit over an existing ceiling fan.

The product is ideal for bathrooms, toilets, ensuites and any other room requiring light and ventilation. It is the perfect solution for meeting building code and local authority requirements.

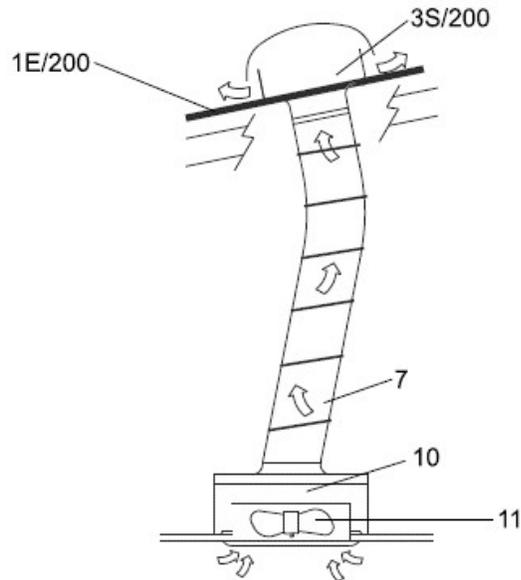

The skylight system illustrations contained in this brochure are the sole property of Regent Skylights and are reserved under copyright law. It is the responsibility of the user to ensure that the selected skylight system complies with the relevant building codes and authorities requirements. Regent Skylights reserves the right to improve or modify the skylight systems at any time. Zinalume® and Colorbond® are registered trademarks of BlueScope Steel Limited. All Wiring and connections to power must be carried out by a licensed electrical contractor to SAA wiring rules.
